

A developing, designing and producing company settled in Sebia, Europe

HIGH END SHOW REPORT

The best performance ever

From 5th until 8th of May 2016, the MOC in Munich hosted the HIGH END, the well-known, popular and successful specialist trade show.

Under the same roof with the biggest names in business Auris presented the ultimate sound experience and definitive source of audiophile inspiration.

By joining forces with some of the veterans in audio high end business like Purist audio design, Tri-planar and Peak consult, Auris definite-

ly showed to be equal to the biggest names in the business. Auris performance was demonstration of supernatural power coming from its TITAN class A/AB, 2 x 150 W High End Power Amplifier.

Long expected phono stage Spinnaker amazed the visitors and brought joy to all vinyl lovers while digital solutions like DHP2 DAC, D2D, D1D, Piano etc. were attention catchers of younger population.

Distinctive, sophisticated de-

sign, warmly glowing tubes and richness of sound, that take us back to nature, have become AURIS trademark. Among 500 exhibitors that were showcasing their products during last week Auris most definitely passed the final test and put the goal bar even higher.

Until next year Auris will do the best to stay faithful to its partners who are accustomed only to a top notch quality in every single aspect that high end products can provide.

High end reinforcement

AURIS NEWCOMERS

Made to indulge the high end needs

In the spirit of trade show and following innovations Auris RnD team felt the need to launch reinforcement in leatherwood collection.

Each of these pieces of art are made to indulge the high (end) needs for quality sound lowers around the world.

DC-125 - 2 x 125W of Class D power with VU meters is the best choice for Class D lovers and 21th century music. Auris genuine leather and real wood design "new age retro style". Powerful affordable quality DC-125 for class D lovers.

DC-250 - 2 x 250W of Class D power with OLED display to display all the necessary messages. The best choice for Class D lovers and 21th century music. Auris genuine leather and real wood design "new age retro style". Powerful quality DC-250 for Class D lovers Available colors: Black or White leather finish.

Piano - A true state of the art preamplifier with 3 analog inputs based on 2 x E88CC vacuum tubes in compact Poison design is the son of our LARGO.

Designed in the same dimensions as our DC-125 and D1D, Piano will enable you to increase your music sources with analog inputs.

Easy to use and uniquely designed with remote control from solid aluminium, it will surely fully please Piano users.

Available colors: Black or White leather finish.

Spinnaker - A careful selection of all components and the use of low-noise vacuum tubes result in a high ratio signal/noise, which is the main advantage of our Phono preamplifiers. An ideal RIAA equalization provides a perfect sound image in the output.

DHP-2 - Digital to analog converter with implemented preamp option and headphone amplifier make this product usable for wide range of systems.

Based on the D1D, upgraded with preamp or direct mode and the best solid state headphone amplifier will allow you to use it in many systems.

Easy to use and uniquely designed with remote control from solid aluminum.

D1D - D1D is state of art High End DAC with PCM 32 bit/384 kHz and DSD Native codec.

3 x COAX S/PDIF and 3 x Optical TOS Link enables connection of several digital sources.

Amanero USB DAC implemented as the USB source makes your choice for connection to PC, MAC, Android or iOS devices. Remote control is made from solid aluminum and allows you to change the source from your chair. D1D has an option to be easily upgraded with Bluetooth or WiFi Airplay/DLNA modules to widen your sources as no similar product these days does. An already known design based on natural wood and genuine leather will be applicable in every room. Available colors: Black or White leather finish

D2D - THE BIG BROTHER OF D1D

High End DAC with PCM 32 bit/384kHz and DSD Native codec.

3 x COAX S/PDIF and 3 x Optical Tos Link enables connection of several digital sources. Amanero USB DAC implemented as the USB source makes your choice for connection to PC, MAC, Android or iOS devices easy.

Remote control is made from solid aluminum and allows you to change the source from your chair. D2D has an option to be easily upgraded with Bluetooth or WiFi Airplay/DLNA modules to widen your sources as no similar product these days does.

A tasteful combination of aluminum and wood to reflect the premium high end character

LAMPION BRAND NEW IDEAS FOR NEW CONQUESTS

Mass production expected within Q3 2016

Auris Audio became a proud owner of "Lampion" brand and design.

"Lampion" is a premium audio brand, offering the high-end audio equipment user a hybrid amplifier experience.

The unique design language consists of a balanced choice of proportions, materials and accents together with subtle controls, elegantly embedded in the top plate. A tasteful combination of aluminium and wood, to reflect the premium, high-end character and support the warm sound created by the vacuum tube amplifier, with deep respect for Scandinavian design culture. The cooling process is efficiently supported by perforated aluminium on the top and bottom plates, where the bottom plate has additionally slightly raised left and right sides.

The overall timeless appeal is achieved by the mentioned material mix, complemented by a glass cover for the vacuum tubes that aims to protect and set them prominently present, offering a functional ventilation recess to prevent overheating.

**Auris at the biggest
IT trade show – CeBIT**

AURIS PUT THE BEAT IN CEBIT

*Small and powerful D-125 system
"rocks" the IT sector*

Even thou IT is not familiar area for Auris brand, it was decided to use the given opportunity and to appear.

The small, but so powerful system D-125 created a stir in IT sector and left in shadow androids, tablets, robots.

Distributors Wanted!

Auris Audio is a dynamic young enterprise and has grown in the past years. In the meantime we are represented worldwide, but we have only just started to take on the world. Special people are the foundation of our success – the best product can't be sold if nobody is able to show the people how good our product really is. We welcome these people in Auris Audio family and are always looking for the right partners in countries where Auris Audio products are not available yet.

All details concerning further cooperation (mutual responsibilities, sales incentives, advertisement & promotions...) we should discuss on meeting. The general specifications of our company can be viewed on our web site www.aurisaudio.rs
